**UNIT PACK...WELL DESIGNED,
COST EFFECTIVE AND THE FLEXIBLE
SOLUTION TO YOUR PACKAGING NEEDS**

...THE PERFECT SOLUTION TO CONTRACT PACKAGING OF LIQUIDS AND CREAMS.

Unit Pack is the effective way to fulfill your sampling and single use packaging needs. Unit Packs are well designed, cost effective, and environmentally efficient. Select the perfect size and shape, from 1/2cc and up, to hold precisely the amount of product desired.

The Unit Pack is manufactured with High Barrier Films, produced from resin and additives which comply with the U.S. Food, Drug and Cosmetic Act for packaging of foods and pharmaceuticals. The film is crystal clear and sparkling white. Color matching available for large orders. The color is pigmented throughout the plastic, not just the surface. It will not scratch, smear or rub off. A very thin, high barrier 6 mil. film protects the integrity of your product from oxygen, water and oil assuring long shelf-life and customer satisfaction. Enhance your Unit Pack with bright beautiful hot-stamped printing. Pick a color, any color. We can

match the PMS color of your choice, even metallics. Imagine your graphics in gleaming gold, shimmering silver, vibrant red, palest blue. Even multi-color printing is available. And unlike flexographic printing, our colors are strong and pure. Our dry print process is heat activated, using no solvents, and our pigments contain no heavy metals.

Unit Pack is a study in effective package design. The easy tear tip is just that, *easy to tear*. Once the package has been opened, a metering channel remains. The channel provides directional control and is designed with an iris tip. Squeeze gently and the channel opens. Stop squeezing and the iris closes, protecting your product. The three dimensional shape and flexible wall assures easy and complete dispensing. The High Barrier Films of the body will not crease or pinhole and strong welding insures the package will survive abuse. Your product remains in perfect condition.

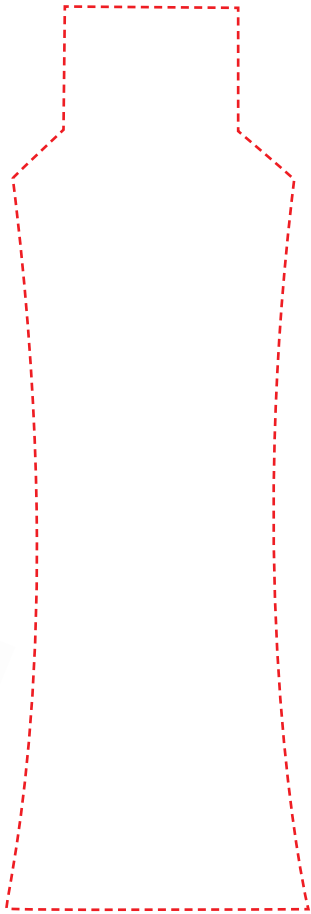

FILM PACKAGING AND ENVIRONMENTAL CONCERNS

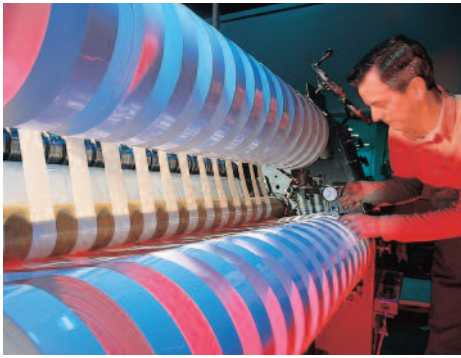

...Heavy Metals

- Our high barrier film is heavy metal free
- Unit Packs are printed with pigments that do not contain heavy metals
- Our hot stamp printing is so clean that no organic solvents are used at our plant

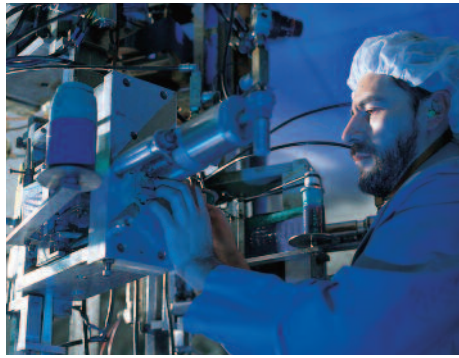

...Source Reduction

- Unit Pack's 6 mil high barrier film packaging require less material to hold the same volume.
- Example: A 1 ounce polyethylene bottle requires 20 times more material than a 1 ounce Unit Pack.
- Unit Packs are manufactured with films that are fully recyclable.  
V OTHER
- Other multi-layered foil pouches cannot be recycled.

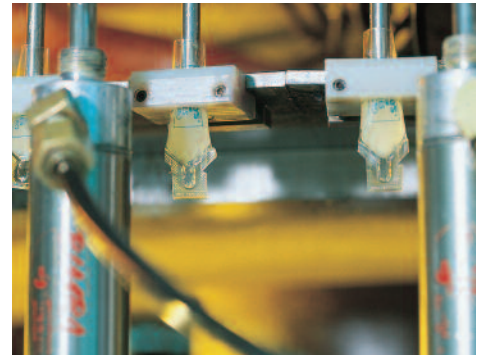

In-house stocking, processing and inspection of our materials insures quality packages and quick turn-around on production runs.

Our well-trained line personnel are essential for high quality and speedy production assuring consistent on-time delivery to you.

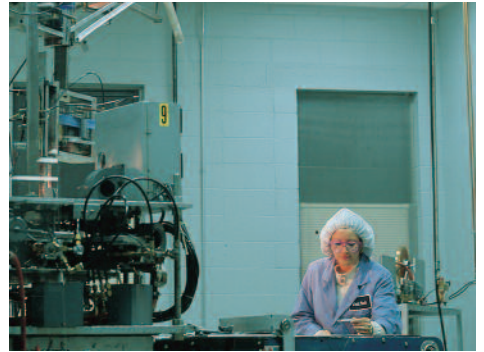

Years of experience with a wide range of products assures easy filling and low waste for even difficult-to-fill products.

Carefully trained inspection personnel assure quality control of your products and our packaging for maximum consumer appeal.

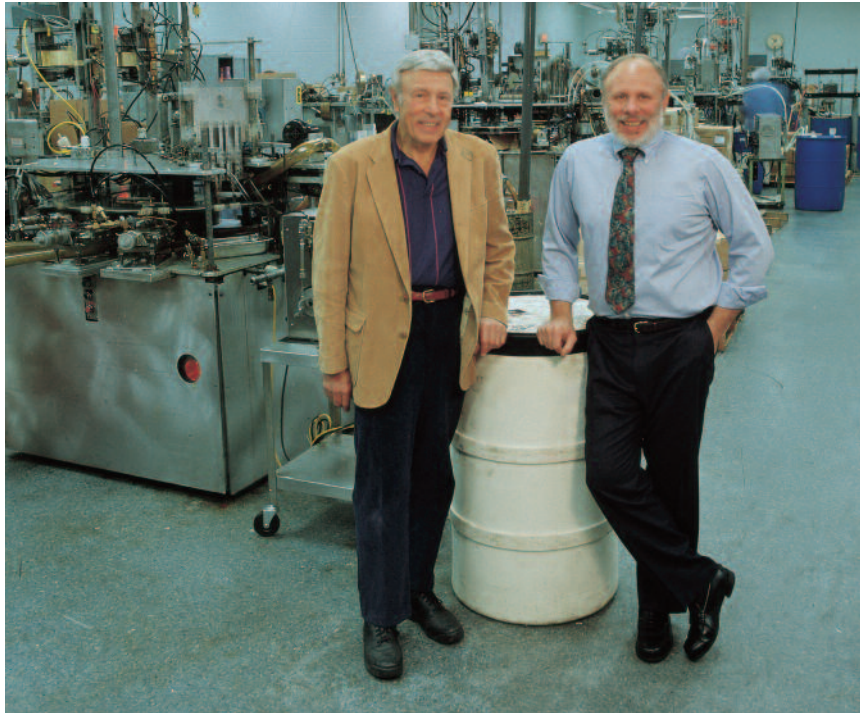

Unit Pack is an FDA inspected packaging facility with all necessary Good Manufacturing Procedures in place.

Our isolated packaging areas protect your sensitive products and pharmaceuticals from contamination.

Unit Pack was founded in 1964 when Ernest Loesser, Sr., completed the first production line. Today, we are a leading producer of single dose film dispenser packaging. Our state-of-the-art facility is designed for flexibility, and our rapid change-over ability assures consistent on-time delivery.

For over forty five years, two generations have continued to focus on customer needs. We recognize not only the importance of providing the best products and services, but also of forging partnerships with our customers in cosmetics, pharmaceuticals and industry. We would like to thank our customers for their continuing support.

The Unit Pack name is synonymous with innovative research and improvements in *unit-of-use* packaging. We have grown ten-fold since 1964 and we stand ready to serve your needs.
