3785 ml. = 1 gallon

TO CONVERT GALLONS TO POUNDS:

Pounds required = gallons required x Specific Gravity of product x 8.35

TO CONVERT ML. TO FLUID OUNCES:

FLUID ounces = ml. x.0338

* Max. print area on back: reduce the smaller dimensions as shown above by 3/32".

† Gallons required based on 100,000 order. High viscous products and orders under 100M require 15% more. (Unused product will be returned.) Note: High viscous products must be in open head 55 gallon steel drums.
